The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-6, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by being Larsson (6146061).

Larsson (6146061) discloses an apparatus for chip removing machining comprising a first part and a second part coupled together by a coupling, wherein the coupling comprises two interacting surfaces and a clamping member for forcing the surfaces together, the interacting surfaces being profiled with male and female members, respectively that are intercoupled to establish a firm locking of the first and second parts against each other, said coupling defining a longitudinal center line, wherein the first and the second parts are provided with aligned holes for receiving the

clamping member, wherein the male and the female members are oriented .on the interacting surfaces such that the male and female members intercouple only in a single position~ the orientation of the male and female members prevents the male and female members from intercoupling in another position; wherein the male and female members are spaced from the center line.

Allowable Subject Matter

Claims 3 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
